I can see the strength of this course will be that the program we are using is very fun and pretty intuitive

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

it seems like lot of what we are doing is with only one program in particular and while thats not bad it would be nice to have some variety if we ever find ourselves unable to use said program

3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?

This course started pretty late which I dont mind but I was unaware that we would be needing to pay \$20 a month for one of the programs, it would have been nice to be given some notice before hand and to have been presented a free alternative or something

1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.

Alot of it is just going through whats in the book so it's not particularly hard to follow and power points are provided there's a lot of material to help students and she seems to enjoy teaching I think I'd have an easier time with the class if I were actually attending the class and not online

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

The scheduling lost me a lot at the beginning and things weren't following the syllabus not to mention the wrong syllabus was put up twice

3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?

The assignments aren't bad but the scheduling of the assignments and when things are updated has thrown me off a couple times but I think it's something I can get used to just having a hard time adjusting maybe slowly build up to the amount of work load you want and have a specific day for putting out said assignments?

<p><i>1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.</i></p> <p>Professor Elinich shows a great understanding of the scripting language JavaScript where she allows us the flexibility to express our interpretation of the fundamental concepts being taught in her online course. I particularly like that fact that she has a specific standard and is not easily willing bend. During assignment dealing with "for" loops, Professor Elinich made it entertaining by allowing us to make a game using its function.</p> <p><i>2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?</i></p> <p>Personally, I would like short and concise videos detailing the higher level concepts that these fundamental ideas will be linked to in order to perform real word task.</p> <p><i>3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to improve the teaching methods and assignments in this course?</i></p> <p>This course can be expanded to encompass other associated libraries in JavaScript such as AngularJS. Given that this is an entry-level course, I think including the more modern languages after the midway point would provide a better transition to the more current technologies.</p>

*1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.*

The content that is generated by Mrs. E is usually a lot more understandable than the book.

*2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?*

The weakness of this course is how heavily it relies on using the book as a guide. I don't feel like the book does a good job linking one topic to the next, and as it gets into more complex topics, seems to go faster rather than slower. Unfortunately, there doesn't seem to be much of a mechanism for making sure the class understands the week's subject matter before moving on to the next (more complex) topic. Maybe there is too much being squeezed into this class, which is supposed to be an introductory level.

*3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?*

I feel like the course has been effective to introduce me to JavaScript and show me how to incorporate it into a website. But the more advanced topics have been very hard to follow. Perhaps it would be better to split this into two courses: an introductory JavaScript & jQuery class that focuses on developing basic skills and building to more complex applications, and then a follow-up class that introduces XML, Ajax, JSON, APIs, and other advanced web programming techniques that involve different syntax.

<p><i>1. Your perceptions of the strenghts of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course.</i></p> <p>The most effective teaching methods for this course have been online videos showing how to use the editing software. Ultimately, basic use of the software seems to be the key to the main projects, along with some critical writing skills.</p> <p><i>2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?</i></p> <p>I completely misunderstood this course going in. Based on its involvement with the Multimedia and Web Programming certificate, and the description on the registration site, I thought that this course would be centered around adapting media players to websites and incorporating various media into code. Instead, the course is only about generating (including editing) the media itself. Since this is not really a focus of the career development I am seeking, I regret taking the class.</p> <p><i>3. Your opinion of the overall effectiveness of this course. What sugesstions, if any, do you have for helping the intructor to imporve the teaching methods and assignments in this course?</i></p> <p>I think the course is effective simply by encouraging practice with the software. The online version of the course doesn't allow for much critical feedback of the artistic elements of the media created, so really it is most effective to get students to practice with the technical side.</p>

1. **Your perceptions of the strengths of this course.** What particular teaching methods or assignments helped you to learn the content or the skills required in this course?

Every assignment helps me improve the skills I need to pass this course and later in the work force.

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

Some directions are difficult to understand, but that isn't the instructors fault.

3. Your opinion of the overall effectiveness of this course. What suggestions, if any, do you have for helping the instructor to improve the teaching methods and assignments in this course?

I feel this course is very effective, I see nothing that needs improving.

I personally really like that Ms. E has a mix of individual and group assignments in this course. It is very much what the real world would be like

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

My only complaint is that it isn't always clear whether we should be reading a chapter in the book to prepare for class. The chapters aren't always mentioned.

1. Your perceptions of the strengths of this course. What particular teaching methods or assignments helped you to learn the content or the skills required in this course?

A strength of this course would be that it's a group based course.

2. Your perceptions of the weaknesses of this course. What particular teaching methods or assignments were not helpful to you in learning? Why not?

The course could go a little more in depth in certain areas.

3. Your opinion of the overall effectiveness of this course. What suggestions, if any, do you have for helping the instructor to improve the teaching methods and assignments in this course?

This course does well at providing students with grasping the basics of game design as a whole.
